Solutions for the Calibration of Radar and Camera Systems

To help professionals repair these sophisticated active safety devices, we provide a complete, modular, multi-brand solution able to meet the diverse needs of automotive professionals, be they glass replacement specialists, body-shop technicians or multi-brand workshops.

The IDC5 software guides the technician step by step throughout the procedures, thanks to dedicated help data sheets specifically developed for each vehicle.

RCCS Multifunctional Multi-Brand Unit for Radars and Cameras

The RCCS (Radar and Camera Calibration System) is ideal to carry out all the calibration operations of cameras and radars.

Composed of -

- a robust main frame, electrically adjustable in height and easy to carry around the workshop thanks to its pivoting wheels
- an adjustment bar, equipped with a sliding reflecting plate and two mirrors
- two self-centring clamps with an innovative system to be instantaneously fastened to the wheel, complete with laser pointers and graduated scales

Modular

Compatible with all TEXA panels, with the possibility to choose only the required panels

Versatile

Can be used in combination with the other specific solutions for the calibration of radars and rear cameras, such as:

- Rear collision warning
- Traffic sign recognition
- Lane departure warning
- Blind spot detection
- Adaptive cruise control
- Night vision system
- Park assist
- 360° camera
