

STR500

3D Wheel Alignment System

The Supertracker STR500 wheel alignment system offers increased efficiency and accessibility with its motorised and fully automated camera beam and advanced software.

The 3D camera support beam is automatically adjusted to the height of the lift.

The Supertracker STR500 is suitable for use with a Full Wheel Alignment Lift.

Increased Accessibility & Reliability

Available upon request, the Pit Version is supplied with double monitor to ease the adjustment in pit.

The compact targets contain no electronics or batteries, meaning less costly repairs if any accidental damage occurs. And, unlike other aligners, the STR500 doesn't use Bluetooth technology, which means problems with connectivity are eliminated.

Advanced Software

The user friendly software is designed to be easy to navigate, clear to read and guides the technician through a variety of vehicle adjustments.

The new vehicle model ranking system allows a rapid and clear selection of the different vehicles and the database contains more than 55,000 vehicles and is constantly updated.

Standard equipment includes:

- Windows operating system
- 42" monitor
- colour printer
- keyboard
- four 4-point clamps 12" to 24" with universal grips and targets
- movable camera beam support with 3D sensors
- brake pedal lock
- turnplates
- wheel alignment software and database for cars.
